- 10000ml – Part#: xnIV-F10

NEW! INKVERSE™ refillable TIJ 2.5 cartridges ready for INKVERSE™ Blade 1000 connection. All suitable inks supported!

Works with all HP TIJ 2.5 (HP45) compatible inkjet systems. Connect and network unlimited INKVERSE™ Blades and cartridges.

INKVERSE™ replaces conventional one-size bulk container solutions with a modular, cost saving, sustainable alternative for inkjet systems of any size and performance.

How INKVERSE™ QuickConnect Works

- Use INKVERSE™ Blades individually or grouped together as mono or multi-color varieties using attachment points included in the packaging.
- Connect each line to INKVERSE™-ready ink cartridges.
- Infuse a wide spectrum of x-nano™ digital inks and interconnect and build custom INKVERSE™ Blade arrays.
- Connect blades to TIJ 2.5 inkjet printers with large cartridge arrays 8.5” - 22” wide and using mono or multiple colors.

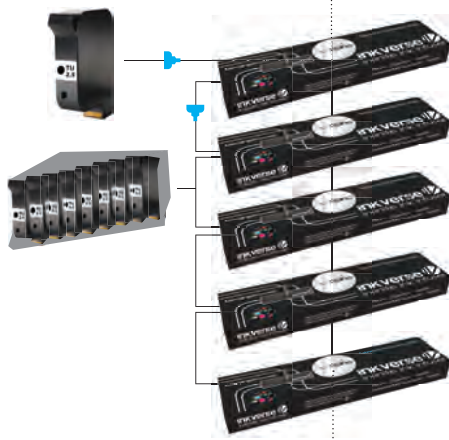

The INKVERSE™ Blade system provides an open-ended and uninterrupted ink supply to inkjet devices regardless of print head technology and performance. The system is quickly adaptable to accommodate a variety of ink types and ink/print volume requirements.

Expandable INKVERSE™ Blades connect any print system from low volume desktops to high-speed production presses, via a simple QuickConnect process, which is easy to install at the user level or pre-configured during system assembly.

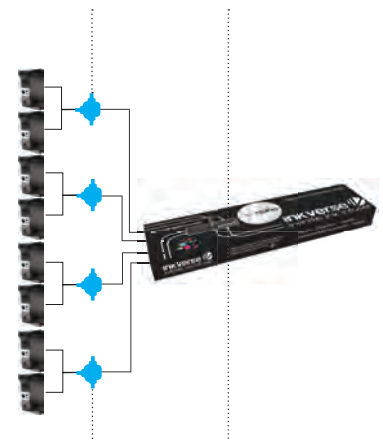

INKVERSE™ Blades are delivered with high-performance x-nano™ ink selected from a library of dye, pigment, dye-pigment hybrid, visible, invisible fluorescent, water, solvent and energy curable inks.
