infinite ink infuser

Precise - Economical - Reliable - Environmentally Sustainable - Flexible

Connect your TIJ 2.5 inkjet to INKVERSE™ and save 50-80% on ink!

Available INKVERSE™ Blade sizes:

- 760ml – Part#: IV-B0076
- 1000ml – Part#: IV-B0100
- 2000ml – Part#: IV-B0200
- 5000ml – Part#: IV-B0500
- 10000ml – Part#: IV-B1000

Precise. Economical. Reliable.
 Environmentally Sustainable. Flexible.
 Powered by **x-nano™** ink technology.

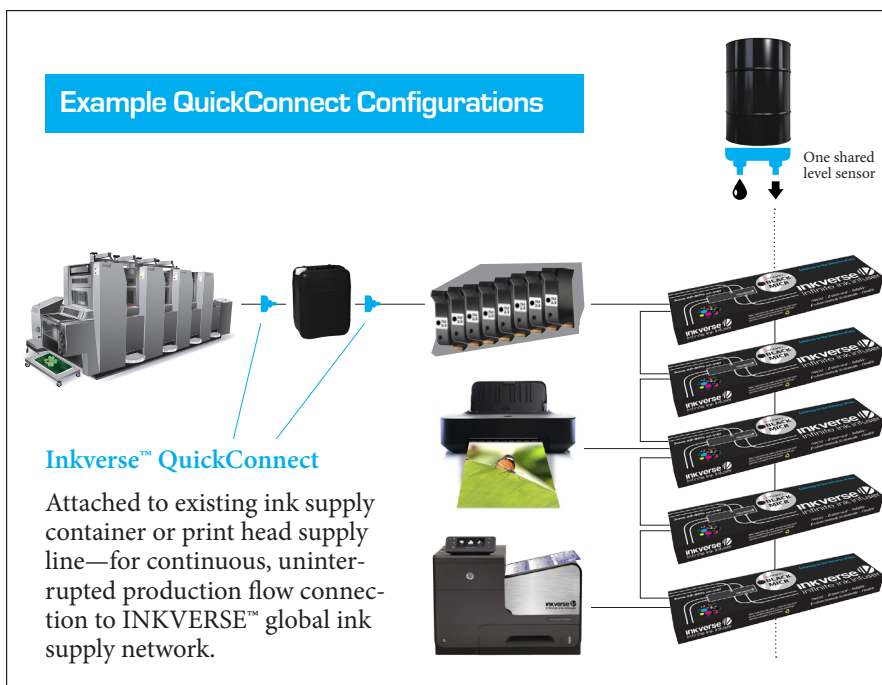

Works with TIJ 2.5 (HP45) compatible desktops, industrial and production inkjet systems. Add and interconnect unlimited INKVERSE™ blades and cartridges.

TIJ 2.5 (HP45) and INKVERSE™

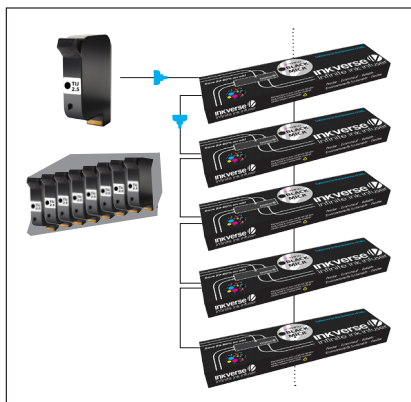

Gateway to the Universe of Inks

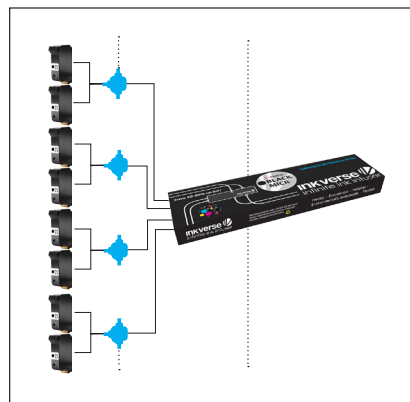

INKVERSE™ replaces a flood of currently in-use TIJ 2.5 bulk containers with a modular, cost saving, eco sustainable INKVERSE™ blade system for TIJ 2.5 based inkjet systems.

Connect any number of blades to multiple printers and print heads for a global supply source.

N blades in 1 print head

Up to 8 connections per blade

- Use INKVERSE™ blades individually or grouped together as mono or multi-color varieties using attachment points included in the packaging.
- Connect each line to INKVERSE™-Ready ink cartridges.
- Infuse a wide spectrum of x-nano™ digital inks and interconnect and build custom INKVERSE™ blade arrays.
- Connect blades to TIJ 2.5 inkjet printers with large cartridge arrays 8.5" - 22" wide and using mono or multiple colors.

About INKVERSE™ Infinite Ink Infuser

General

The INKVERSE™ Infinite Ink Infuser blade system provides an open-ended and uninterrupted ink supply to inkjet devices regardless of print head technology and performance. The system is quickly adaptable to accommodate a variety of ink types and ink/print volume requirements.

Expandable INKVERSE™ blades connect any print system from low volume desktop all the way to high-speed production presses, via a simple QuickConnect process, which is easy to install at the user level or pre-configured during system assembly.

x-nano™ Ink Types

INKVERSE™ blades are delivered with high-performance x-nano™ ink selected from a library of dye, pigment, dye-pigment hybrid, visible, invisible fluorescent, water, solvent and energy curable inks.

Volume Increments

The INKVERSE™ Infinite Ink Infuser blades are available in a variety of volume increments: 360, 760, 1000, 2000, 5000, 10000 ml. All blades are inter-connectable, without limitation, extendable and shared for infusion of ink into existing delivery containers or directly to print head feed lines.
